

Hello, world!

Andreas Sorge

September 2, 2014

This is our hello world notebook!

```
In [1]: print("Hello world!")
```

Hello world!

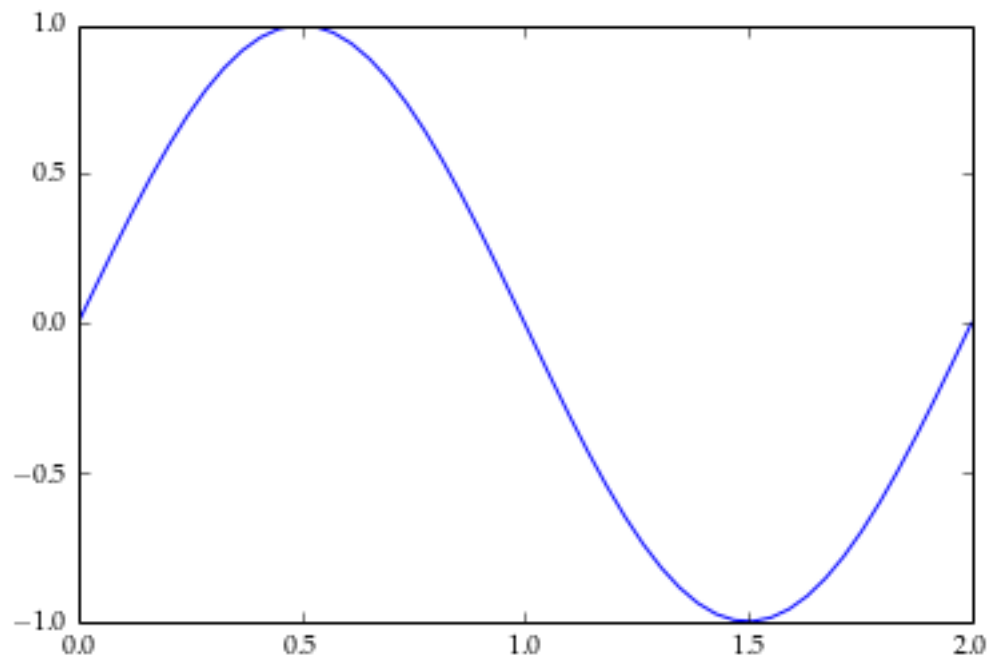

Here we continue with some formula

$$f(x) = \sin(\pi x), \tag{1}$$

which we would like to plot

```
In [2]: %matplotlib inline
import matplotlib as mpl
import matplotlib.pyplot as plt
import numpy as np
```

```
In [3]: x = np.linspace(0., 2.)
plt.plot(x, np.sin(np.pi * x))
plt.show()
```

This is the end of the file.
